Please find below and/or attached an Office communication concerning this application or proceeding.

Advisory Action Before the Filing of an Appeal Brief --The MAILING DATE of this communication appears on the cover sheet with the correspondence address - REPLY FILED 17 January 2007 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance: (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3)

The MAILING DATE of this communication appe	ears on the cover sheet with the correspondence address	
THE REPLY FILED <u>17 January 2007</u> FAILS TO PLACE THIS A	APPLICATION IN CONDITION FOR ALLOWANCE.	
this application, applicant must timely file one of the folloplaces the application in condition for allowance; (2) a No	n the same day as filing a Notice of Appeal. To avoid abandonment of wing replies: (1) an amendment, affidavit, or other evidence, which otice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; oce with 37 CFR 1.114. The reply must be filed within one of the follower.	or (3)
a) \boxtimes The period for reply expires $\underline{3}$ months from the mailing date	e of the final rejection.	
no event, however, will the statutory period for reply expire	Advisory Action, or (2) the date set forth in the final rejection, whichever is lat later than SIX MONTHS from the mailing date of the final rejection. (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN 106.07(f).	
Extensions of time may be obtained under 37 CFR 1.136(a). The date have been filed is the date for purposes of determining the period of exunder 37 CFR 1.17(a) is calculated from: (1) the expiration date of the	on which the petition under 37 CFR 1.136(a) and the appropriate extension on the corresponding amount of the fee. The appropriate extension shortened statutory period for reply originally set in the final Office action; or r than three months after the mailing date of the final rejection, even if timely	n fee (2) a
	pliance with 37 CFR 41.37 must be filed within two months of the daths of the daths of the daths of the appeal. So within the time period set forth in 37 CFR 41.37(a).	
 The proposed amendment(s) filed after a final rejection, (a) They raise new issues that would require further co (b) They raise the issue of new matter (see NOTE below) 		or
(d) They present additional claims without canceling a NOTE: (See 37 CFR 1.116 and 41.33(a)).

Advisory Action

- 1. The amendment of method claim 13 by incorporating the subject matter of claim 16, places the product in product claim 1 into said method claim 13. Hence no new issues are raised. In the event of an appeal, Applicant is advised to make it clear that the subject matter of claim 16, now incorporated into claim 13, was addressed in the Office action dated 10/17/06.
- 2. The request for reconsideration dated 01/17/07 has been fully considered and deemed unpersuasive for the reasons set forth below.
- 3. Applicant argues that Buzzell is completely silent about using a crosslinking agent in an adhesive layer, since Buzzell refers to the use of a crosslinking agent a catalyst only when using PVA as one material for producing a basic nitrogen-containing polymer.

Applicant is respectfully apprised that it is the primary reference of Ishizaki that teaches the boric acid agent in the adhesive (aqueous solution of a boron compound as the adhesive material, purpose, boron compound refers more specifically to boric acid, constitution), wherein the adhesive does not comprise polyvinyl alcohol. While Ishikawa fails to explicitly teach that boric acid is deemed to be inherently a crosslinking agent, Ishikawa teaches that the boric acid solution functions as an adhesive, and is applied to the surface of a polyvinyl alcohol film with the application of heat (system, abstract), which means that boric acid carries out some form of reaction with the application of heat. The fact that boric acid is inherently a crosslinking agent that carries out a crosslinking reaction, is disclosed by Applicant (original claim 3). Ishizaki fails to teach

Application/Control Number: 10/071,301 Page 3

Art Unit: 1772

the use of a catalyst with the boric acid crosslinking agent. However, this is well known in the art as evidenced by Buzzell. Buzzell is the secondary reference that explicitly teaches that boric acid is inherently a crosslinking agent that carries out a crosslinking reaction (column 5, lines 40-50), and teaches that a catalyst is used with the boric acid crosslinking agent, for the purpose of aiding the crosslinking reaction (for the crosslinking reaction, column 5, lines 71-76).

4. Applicant argues that Buzzell teaches that the catalyst is only added to the crosslinking agent in the mordanting layer, which is different from the adhesive layer in Buzzell, and thus does not provide any guidance regarding any purposes and/or effectiveness of a catalyst in an adhesive layer such as the one in Ishizaki.

Applicant is respectfully apprised that as discussed above, the primary reference Ishizaki, teaches that the adhesive layer contains the boric acid, which is inherently a crosslinking agent, and that the secondary reference Buzzell specifies that boric acid is a crosslinking agent which carries out a crosslinking reaction, wherein a catalyst is used with it to aid the crosslinking reaction (column 5, lines 40-50, 71-76).
